DETAILED ACTION

Response to Amendment

1. The Examiner has carefully considered Applicant's amendments and remarks dated 03/07/06. Applicant's amendments to the claims have been entered. The terminal disclaimers submitted over applications 10/786416, 10/777159, 10/987162 and 11/098639 have all been entered and overcome the Double patenting rejections made in paragraphs 8-12 of the last office action. Applicant's amendment to the claims overcomes the 112-2 issues also, however as Applicant has stated in the their response the preamble is being given its broadest reasonable interpretation that is that the composite could be found anywhere in an article of footwear. That said- the cited art rejection in paragraphs 6-7 of Colvin et al. is maintained as still teaches a footwear insulation having the required layers, both structurally and chemically. Applicant's second traversal is that Colvin does not teach the required transference of moisture. To this the Examiner contends that Colvin et al in combination use the same foam coated with same phase change materials against a nonwoven layer. According to Applicant's specification it is the phase change material that cause the transference of moisture, which is also found in this combination, therefore with all layers being present the transference of moisture would automatically happen. Consequently, Applicant's arguments are not found to be persuasive. Additionally, Applicant's claims are open ended- "comprising" thus the presence of additional layers are acceptable.

Claim Objections

2. Claims 25, 37, 44, 45, and 52, and 53-58 are objected to because of the following informalities: The pending dependant claims have not been correctly amended to deleted the words "technical footwear" and be replaced by "An article of footwear". Appropriate correction is required.

Claim Rejections - 35 USC § 103

3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
4. Claims 22, 25, 37, 39, 44, 45, 47, 52, 53, and 55-58 are rejected under 35 U.S.C. 103(a) as being unpatentable over USPN 5637389 issued to Colvin et al further in view of Ogden et al. further in view of Harada et al. USPN 4894932 as set forth in the previous office action in paragraphs 5-7.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
